Curriculum Summary

I hold a Degree in Informatics Engineering (Grado en Ingeniería Informática) by the School of Informatics (FIB) of the Universitat Politècnica de Catalunya (UPC). In 1994-1999 I was a R+D engineer at "El Periódico de Catalunya" (Grupo Zeta) developing computational methods for newspaper production and machine translation. In 1999-2004 I was working at Ubisoft Entertainment as lead physics programmer developing the video game ProRally 2002 (PS2 & NGC).

I started my academic career at the Complex Systems Lab (UPF) as a PhD student in the context of three European projects (6th Framework Program), and later as a post-doc associated to the project "Emergence of Complexity in Tinkered Networks" (McDonnell Foundation). My PhD Thesis "Evolution and Dynamics in Information Networks" was advised by Ricard Solé within the Doctorate Program of the Physics Department at the UPC. After a post-doctoral stay in Toulouse (France), I am now Visiting Assistant Professor at the Department of Experimental and Health Sciences (UPF) and member of Institute of Evolutionary Biology (UPF-CSIC). I have active research collaborations with members of the Université Paul Sabatier (Prof. Guy Theraulaz, Research Center on Animal Cognition), Georgia Tech (Prof. Joshua Weitz, School of Biology), Universitat Politècnica de València (Prof. Santiago F. Elena, Evolutionary Systems Virology Group), UPF (Prof. Jordi Mestres) and the Santa Fe Institute (Prof. Cris Moore). Recently, I have been awarded with a Spanish National Grant.

My interdisciplinary research is at the intersection of computer science, evolutionary biology and statistical physics. I have published around 48 peer-review articles in network science, systems biology, self-organisation, collective intelligence, and technological and cultural evolution (Google Scholar: 2804 citations, H-index: 27). I teach mathematical biology, computer simulation and evolutionary algorithms in the Degree in Human Biology (UPF) and the Degree in Biomedical Engineering (UPF).
