Curriculum Summary

Sergi Valverde is a visiting professor in the degree of Biomedical Engineering at Universitat Pompeu Fabra (UPF), from the Department of Experimental and Health Sciences (DCEXS) and member of the Complex Systems Lab and the Institute of Evolutionary Biology. He holds a Degree in Informatics Engineering and a PhD in Applied Physics by the Universitat Politècnica de Catalunya (UPC). His long-term research goal is to understand the common design principles and evolutionary dynamics of living and artificial systems. Sergi has 15-years of expertise in the areas of complex systems and computer simulation and he has published more than 48 peer-review related articles in network science, systems biology, collective intelligence and technological and cultural evolution (Google Scholar: 3028 citations, H-index: 27). He was involved in the three major IST FET FP6 projects in Complex Systems (PACE, ECAgents and DELIS). He is now coordinating the project CLUSTECH (Detecting Emerging Technologies in Innovation Networks), funded by the Spanish Agency of Science and Technology.
